MAIN STREET -- BOW ISLAND

No. 1307 1922 NOTICE OF SALE JUDICIAL SALE OF FARM PROPERTY

PURSUANT to the order for sale made in the action of Henry Waite vs. Frank Joseph Harris, there will be sold by Roy S. Beattie, auctioneer of the town of Bow Island, at, near the Post Office in the Village of Winnifred, Province of Alberta, on the 18th day of October A.D. 1922 at the hour of 3 o'clock in the afternoon, the following lands and premises: The North West quarter of Section Thirty-Six (36), and the North-East Quarter of Section Thirty-Five (35), both in Township Ten (10), Range Ten (10), West of the Fourth Meridian, in the Province of Alberta.

The property will be offered for sale subject to reserved title which have been filed by a Judge. The properties will be offered for sale separately and en bloc. The terms of the sale are 10 per cent in cash at the time of sale, 15 per cent in sixty days; 25 per cent in six months from date of sale; 25 per cent in one year, and the remaining 25 per cent in two years from date of sale, with interest at the rate of 8 per cent per annum.

The Plaintiff is informed that there is situated upon the North-West quarter of Section Thirty-six (36) in Township Ten (10), Range Ten (10), West of the fourth Meridian, the following improvements: Dwelling house, barn and small outbuilding; that 150 acres have been broken; that all the above improvements are in only a fair state of repair.

The Plaintiff is informed that there is about two miles of fencing on the North-East Quarter of Section Thirty-Five (35) in Township Ten (10), Range Ten (10), West of the Fourth Meridian, in a fair state of repair.

Further particulars of the conditions of sale may be had from F.O. McKenna, Solicitor for the Plaintiff, Bow Island, Alberta.

DATED at the City of Medicine Hat in the Province of Alberta, this 18th day of June A.D. 1922

S. A. WALLACE
Clerk of the Court

APPROVED
GEO. W. GREENE
L. J. S. C.

Crop Report

Alberta has had a couple of weeks of ideal threshing weather. Up to the end of September, no damaging frosts are reported from any portion of the Province. Medicine Hat reported 80% of threshing completed. Lethbridge 60%, Raymond 85%, Vermillion 60%, Gleichen 65%, Youngstown 90%. Athabasca and Peace River Country, threshing well under way.

The yields reported are variable as regards the whole province. This is also true of many different sections were only average yields, go alongside very poor yields, the slightly better yields being largely attributable to summer-fallowing and good farming. threshing in turning in records for small communities also show variable yields and some very poor and some Total Failures.

Only fair grain crops are reported in the south and southern portions of the Province. Only fair yields are reported in the Cardston, Pincher Creek, Lethbridge, Claresholm, Vulcan and Taber districts report very poor yields. Points along the Goose Lake Line report light crops; also points in the eastern part of the central portion of the province. In the Gleichen-Basano district, on non-irrigated lands, the yields have been fair, but lower than expected. East of Edmonton, on the C.N.R. the wheat is running from 10 to 15 bushels on stubble and 20 to 30 bushels on summerfallow, oats averaging 30 bushels and barley 20 bushels. In the Athabasca country, wheat will average 20 bushels, oats 40 and barley 25 bushels. In the Peace River Country, the crop as a whole is lighter than usual, with odd points showing better yields.

The bulk of the south crop is grading No. 1 Northern. Wheat on the main line of the C. N. R. east of Edmonton, is grading No. 1 and No. 2 Northern.

Bow Island News

Welcome Rain On Tuesday

Great Help For Fall Plowing

Once again our old pioneer friend Mr. D. Needham showed his Steady Interest and Loyal Faith in these districts of ours in Sunny Southern Alberta.

It was only last Friday Mr. Needham said it was his belief, that we would have Rain on the following Tuesday and it has come, here it is, for on Tuesday we had a Rain that will be helpful to our Farmers in their Fall Plowing.

Hundreds of people will remember that it was Mr. D. Needham that last spring Boosted and Worked so hard for the Lister Machine and Lister Methode which has given good results to those that used them.

Mr. Needham also predicted a good crop for next year 1923, we devoutly give a hearty "Amen" to that Optimistic prediction.

The finest asset that our Alberta or indeed any other country in the World can have, is "Optimistic" and at the same time "Thoughtful Thinkers" and "Active Workers" like Mr. Needham—for when Storekeepers as well as Farmers are staggered and reeling from the blows of Poor Crops and some Total Failures and the way the Grain Markets are working to give the lowest prices to the Farmers, then indeed do we need Optimism of the strongest kind and well united to "Thoughtful Planning" carried out with "Genuine Earnest Hard Work" for Crops will not grow without it. As it says in the Bible "Faith without works availeth nothing" so let us all work with Faith and Optimism in our hearts.

We have heard that some of the people intend to move to Sunburst which is just across the line, as they think that place is very good for some business—and others intend to make a stay at Vancouver and if business in their line looks good there they intend to stay there.

Baby Clinic October 14th.

The Women's Institute are holding a "Baby Clinic" in the L.O.O.F. Hall on Saturday the 14th. October, from 2 o'clock until 5 p.m. Nurse Greene will be in attendance and will examine all children under six years of age.

It is open and free to all mothers who care to bring their children to be examined, mothers should take advantage of this opportunity to have their babies examined.

The Women's Institute will hold their regular meeting on Saturday 21st. October.

Clearing Out Our Shoe Stock

I have decided to clean out my entire stock of Leather Shoes, we have some Good Buys, some of these Shoes are below todays wholesale prices, when in need of Shoes give us a call. I am sure you will be satisfied.

ROBINSON General Store
Main Street—Bow Island

Mrs. A. Smith has sold her private residence in town to Sun Chuen, who is returning this week from China with his wife, they will reside in Bow Island in this residence.

Mrs. Smith is shipping a car of her furniture on Friday to Blueberry, N.D. for which place she and the children will leave for on Friday, they are intending to make their future home there.

Miss Irene Smith and Miss Watson left for Lethbridge last Tuesday morning to spend a few days with their aunt there, before leaving for North Dakota.

Mr. Wiley Vannoy left Bow Island on Tuesday morning for North Carolina, where he will stay with his father who has been quite ill, but is now somewhat better.

Mr. Vannoy has rented his farm to Mr. Fred Taylor, Mr. Vannoy expects to pay a visit to Bow Island next Fall.

BORN—To Mr. and Mrs. P. Duffy, on Monday 2nd, a son
Dr. Cairns attended

Mr. Deupster's son broke his arm on Sunday falling off the roof he is now getting along nicely.

BORN—To Mr. and Mrs. J. Ancion, daughter at Medicine Hat Hospital.

The son of Louis Pomarieu, who has been sick lately is now somewhat better.

Mr. Waite of Pleasant View was a business visitor to Bow Island last Saturday.

The U.F.A. are requesting the government to have a ferry to cross the river near the Landlight ranch.

Mr. Ralph Fisher from Lethbridge is visiting friends in Bow Island.

Mr. P. Whit who has been visiting with Mr. Burnham, has returned to his home in Calgary.

It has been reported to us, that there is now practically no work to get in Saskatchewan as the jobs that were going there have all been filled up. We simply had this statement, on it as it was given to us.

Mr. Frank Ley is expected to return to Bow Island this week end, and take up his residence on his farm.

Mr. and Mrs. Hopkins are moving into town for the winter.

The All Saints Ladies' Aid met at the home of Mrs. Hobson, on Thursday after the business was over a most sociable time was spent, during which the Hostess served a very delicta tea.

We are glad to report Mrs. Browning in much better health than she has had for the last few weeks.

Miss Dolly Browning is visiting with the Misses Ridgdale for a time.

A most successful Auction Sale was held last Saturday by D. M. Garvin, when Mr. Andrew Anderson sold his goods, a good crowd was present.

Mrs. Ridgdale entertained a few ladies to tea on Monday afternoon.

Grain Prices

Local prices for grain here at Bow Island on Thursday 5th. October are as follows:-

Wheat No. 1 Northern 74c per bushel
Oats 2 C. W. 31c. per bushel
Rye 46c. per bushel
Flax 81.5c. per bushel
Barley 35c. per bushel

Mr. Andrew Anderson and family have left to make their home in Idaho.

Mr. Schilder is another addition to the C.P.R. staff here, being employed as operator.

The United Ladies Aid will meet in the United Church next Thursday the 12th, with Mesdames James and Ross as hostesses.

Mr. and Mrs. H. S. Beattie had a fire at their home on Wednesday, 4th, it was discovered in the clothes closet all their clothing was burnt up, but the fire was extinguished before doing any further damage to the house, the cause of the fire is unknown, it is thought to be probably due to mice getting at some matches.

N-O-T-I-C-E

A further Extension of Time allowing the Discount of 10% will be given until October 14th 1922 on Current School Taxes only.

Maleb News

Mr. and Mrs. T.A. Reynar and little Jean and Mr. S. Reynar were the guests of Mr. and Mrs. W. Brown on Sunday.

Mr. and Mrs. W. Hare and family were visitors at the home of Mrs. McKnight on Sunday.

Mrs. Hakenson had the misfortune to lose two head of cattle this week through eating too much wheat at a stack.

Mrs. T.A. Reynar was visiting at the home of her sister Mrs. P. Duffy on Tuesday.

The U.F.W.A. meeting was held at the home of Mrs. C.H. Reynar yesterday Thursday, after the business meeting was over a delicta lunch was served and enjoyed by all.

Girl found Hanging

The fatal step may end the most happy life; the most cultured, beautiful and best loved are not exempt from the same fate.

A father's devotion, a mother's fond tears and love of a brother's or sister's companionship will not shield them when they decide to take the step.

Such was the illustration last evening when one of the most refined girls was found hanging in the home parlor, surrounded by all the luxuries that go to make a happy life.

Late in the evening she was missed and a careful search failed to reveal her whereabouts. The telephone was used without result. Her friends were called to search for her, but no one was able to locate her. Finally the almost heartbroken mother returned to the parlor and there to her surprise she found her beloved daughter hanging. How the mother was affected by the sight that met her gaze! There was that daughter hanging to her sweetheart's neck begging him to subscribe to the Bow Island Review, that he might be better posted on events in the district.

He Subscribed—so should you.

Says Canada should have offered help

Declaring that what Great Britain wanted from the British Dominions was a declaration of the Empire's solidarity to meet the New-England crisis, and that the King government's delay in replying might serve to drag Canada into war, Arthur Meighen, former premier, and now Conservative opposition leader, Mr. Meighen declared that he would back up the government in making a message of loyal co-operation overseas as New Zealand and Australia had done. He pointed out that Canada was a party to the Treaty of Sevres.

Not only were we a party to it, but on a motion of the present premier we ratified by legislation the action of our representatives in signing the Treaty, said Mr. Meighen. "Yet, when Canada is appealed to, and asked to stand by her compact, when Canada should have said, 'ready, aye, ready,' we did nothing. There was no suggestion of sending a force overseas, as far as we can gauge from the evidence we have received. What Britain sought was simply a declaration of solidarity from the component parts of the Empire, a solidarity the existence of which we thought the late war had made abundantly evident. No far as we know, it has not up to the present time, has received no declaration of this kind from Canada."

"We bring ourselves no nearer the danger point by such a step, rather we make the best move to offset the probability of such a war coming, by showing a united front."

The Review thinks Mr. Meighen's argument is a sound one.

And it makes you feel splendid

National Land Settlement

To all new countries immigration is a matter of vital national importance. Just as emigration becomes a matter of individual and national importance in older countries with teeming populations and a restricted land area.

For a century the United States has been the home of the hard-pressed European emigrant, and the present population of more than one hundred million which the United States owes is the result of the economic influx of people to that land. Within the comparatively brief period of four or five generations, the United States has grown from a settled pioneer country into one of the most populous, highly organized and wealthiest nations in the world. It no longer offers great inducements to the poor man and his family in Europe who is forced by stress of circumstances at home to seek a new land.

This fact was fairly generally recognized some years before the Great War, and in the ten or fifteen years prior to the war the stream of European emigration was increasing by tens of thousands of settlers to this country. The population of Western Canada increased by leaps and bounds, millions of acres of homestead lands were taken up, great colonization companies actively assisted in directing tens of thousands of settlers to this country, villages grew into towns, and towns into cities almost overnight, production increased amazingly, and the whole of the Dominion largely developed and made prosperous.

The outbreak of the first World War brought about a sudden stop to all European emigration, while the exhaustion of free homestead lands and the final disposal of these large blocks of land controlled by colonization companies operated to shut off immigration of agricultural settlers from the United States. Since 1914, therefore, Canadian immigration has been at low ebb notwithstanding the great need of this Dominion in the matter of population to develop its great wealth of virgin natural resources.

Since the Armistice there has been a steadily growing opinion that Canada must make up and endeavor to revive the stream of immigration which was bringing life and prosperity to this country before the war. At the same time it was realized that direct-bearer problems calling for solution made it imperative that such immigrants as were admitted to Canada must be of a type which would help the Dominion and not add to the problems with which the country was confronted.

The situation now is that the population of Great Britain is growing more rapidly than can be provided with means of livelihood there. Emigration on a large scale must take place. On the other hand, the vacant spaces of the world where white people can live and prosper are largely to be found in the British Dominions of Canada, Australia, New Zealand and South Africa. It is agreed that it is the part of Empire statecraft to scientifically direct the emigrating Englishman or Scotchman to these outlying parts of the Empire, thus keeping him under his own flag and at the same time adding to the economic strength of the Motherland and the Dominions.

Therefore, the British Government has created what is known as the Overseas Settlement Board and placed at its disposal some hundreds of millions of dollars to assist settlement of people from the British Isles in the Overseas British Dominions. Each of the Dominions was invited to develop its own plan of immigration and land settlement and work in co-operation with the Overseas Settlement Board in London. The plan of the minimum number of sturdy British settlers may be settled in the Dominion under conditions guaranteeing reasonable prospects of life and livelihood.

Some time ago Australia announced their scheme, and for some months past the stream of British emigration has been largely directed to our sister Dominion. In the meantime, and for some months past, the Dominion Government has been studying the whole problem of immigration in its relation to Canada's needs and its best interests, and a special committee of the Federal cabinet has been in consultation with the several Provincial governments, railways, and companies, and finally, in the light of the information so gathered, in regard to the subject of immigration and land settlement.

The result of this study is the new situation of the problem is found in the announcement made this month by Hon. Charles Stewart, Minister of Immigration and Colonization, of the Immigration policy of the Government, and to which immediate effect is to be given.

Inasmuch as the carrying out of a successful immigration and land settlement policy is of vital importance to every Dominion, and inasmuch as the results to every resident of Western Canada, and furthermore as the assistance of every individual of every Dominion in the Dominion is to be secured, the results, some attention to the plan evolved will be given in a subsequent article.

Prince Has Heavy Mail

Three Secretaries Attend to Letters Delivered to York House

The Prince of Wales normally receives about seven hundred letters a day, though there have been occasions when the contents of the mail delivered to York House in the day contained well over fifteen hundred letters.

A couple of weeks before the Prince

started on his Indian tour, 2,000 letters a day were delivered to his Royal Highness. The completion of the Prince's establishment, assisted by three secretaries, attends to the Prince's letters, the controller bringing under the Prince's notice communications which he thinks require the personal attention of his Royal Highness.—The Star.

Mystery Is Solved

Chinese Laundry Ticket Is Nothing But A Number.

The Chinese laundry ticket is a simple thing when one understands the system. According to the very polite words of some sixteen young men and buskers Chinese, a business man who has practically retired from the heavy labor and now gets a little exercise on lady's walks and dresses which he likes to iron, the Oriental laundress, which is torn to two to no description of the person who has left laundry or any other interesting thing. He says that in his establishment nothing but a number is written in Chinese.—New York Sun.

Cocaine Cultivated in Java Cocaine first obtained recognition as a valuable medicinal drug about thirty years ago, and the commercial supply was derived from leaves of the wild coca plant native to Peru. Now, however, the shrub is cultivated on an extensive scale in Java, which will export this year about 4,500,000 pounds of the leaves.

Keep Minard's Liniment in the house.

Shelter For Machinery

Your Farm Machinery Is Certainly Worth Protecting

An inexpensive shelter can be erected by using a few uprights with a roofing of lap lumber, rubberoid or even straw. In many places there are plenty of trees to supply uprights. The back and two ends can be finished in rough lumber or lashing the in woven wire packed with straw. The shed should be deep and low enough to prevent drifting from the entrance on the implement, and should front in a sheltered place or away from the prevailing drifts. A little reasonable paint on the woodwork and even on the metal of the machinery saves its value many times over, while a touch of oil or grease upon the knives and friction portions is like the stitch in time that saves the shoe.

Keeping the machinery under cover undoubtedly prolongs its life. Moreover, during the busy season it is a saving of valuable time to find it in good running order, bolts and chain links in place, and sprockets and gears not needing those minor repairs that mean many times their value in critical moments saved.

EVERY WOMAN

IN POOR HEALTH

Has an awful struggle. Lots to do, all kinds of worry, poor appetite, headache, nervousness, and a host of other troubles for more strength and better health. What is the cause of the trouble? It is a cleansing, blood purifying remedy like Dr. Hamilton's Pills. This wonderful medicine cleans out the wastes from the system, regulates the bowels, and gives you a new lease of life. Dr. Hamilton's Pills regulate, 25c at all dealers or The Catarrhoe Co., Montreal.

No Traveler

First Yuletide—They say that professional chap who lives atop o' the hill has written a book about Mark Twain's "dime-dime" novel. "No, he knows about Mark Twain, to my knowledge he ain't been to my knowledge for five years."

CHILDHOOD AILMENTS

The ailments of childhood—constipation, indigestion, colic, colds, etc.—can be quickly banished through the use of Baby's Own Tablets. They are a mild but powerful remedy which is scientifically formulated to contain no harmful drugs and can be given to the youngest baby with perfect safety. "Concerning Mrs. Alcide LePage, St. Louis, Quebec, who writes: 'My baby, three months old, was very ill with colic and constipation. I gave him Baby's Own Tablets and he was well in a few days. I have been using them ever since.'"

In the Island of Jersey it is unlawful for a married woman to start a bank account without obtaining her husband's permission in writing.

Worms in children work havoc. These pests attack the tender lining of the intestines and, left to get on their ravages undisturbed, will ultimately perforate the wall, because these worms are of such kind as to cling to and feed upon the interior of the bowels. Worms, if not promptly exterminated, may cause the most serious of diseases. Worms prevent the power to repair the injury they have done.

The Best of Reasons

"I never ask others to think as I do," remarked the broadminded man, "because tomorrow I may think differently myself."

Corns are painful growths. Holley's Corn Remover will remove them.

Device to Keep Ships From Rolling

Huge Gyroscopic Stabilizer Steadies Liner Automatically

"Thousands of people will be glad to know that travellers by sea may look forward to the day when sea sickness has become a thing of the past."

The Hawkeye State, a passenger liner company running between Baltimore and Honolulu, is now being fitted with a huge gyroscopic stabilizer, designed to prevent the rolling of ships.

This apparatus, which weighs 10 tons and is said to be the largest of its kind ever built, is the first to be placed in the hull of a passenger ship. It reaches a speed of 810 revolutions a minute, and is controlled by a series of small gyroscopes. These register the direction of the roll, and the big wheel is then automatically set in motion in the direction required to steady the ship.

Debts and Claims

We do not want to make a virtue of generosity, but unless the cancellation of inter-Alleed debts is accompanied by a general settlement of international claims, our nerves will have been in vain.—Westminster Gazette.

Passenger Men to Gather in West

Important Meeting of Passenger Agents in Canadian Pacific Rockies

One of the most important of the many conventions being held in Canada this year will be that of the American Association of Travelling Passenger Agents which will take place in the Canadian Pacific Rockies this month. American interest in this country has been growing by leaps and bounds since the war and this is being shown by the steadily increasing number of Americans who are visiting this country. In the Canadian Pacific Rockies and in the unequalled summer resorts of Ontario, Quebec and the Maritime Provinces are found endless attractions for visitors from the United States, and some of the conventions that have, across the line have been of tremendous importance in that they have enabled thousands of America's business men to become acquainted with this country and have thus greatly encouraged the development of trade, customarily profitable to Canada and their native land.

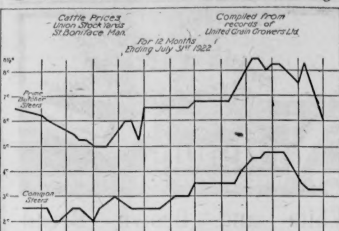

The holding of the annual convention of the passenger agents in Canada this year is a matter of first-rate importance to this country, and particularly so to those places which will be visited during the tour of the country, that takes place in connection with the convention. These agents are all the time in touch with travellers, and they are in a position to divert much traffic along lines that they believe to be desirable. Thus it is important that they should be well acquainted with Canada, its larger cities, its points of scenic interest and the opportunities which the country affords.

The Association is made up of passenger representatives of railway and steamship lines on the North American continent and has as honorary members many passenger traffic managers and general passenger agents. At the convention held at Salt Lake City in September, 1921, an invitation was extended by the Canadian Pacific Railway for the Association to hold their 1922 convention along the lines of the Canadian Pacific. This invitation was enthusiastically and unanimously accepted and from the interest being shown by the members there is no doubt of a record breaking attendance this year.

Minard's Liniment Lumberman's Friend

No two finger nails on our hands grow at the same rate. The nail on the middle finger grows faster than any other, while the thumb nail is of slowest growth.

Conditions For Livestock Marketing

Instead of selling unfinished cattle in the latter half of the year, sell finished stock from January to June. Such is the reason of the course of prices at the Union Stock Yards, St. Louis, as shown by the chart above. The upper line shows the prices of prime butcher steers from the first of August, 1921, to July 31st, 1922. The variations shown are typical of almost any year. The reason is that Western Canada markets a great number of immature and poorly finished cattle every year. The movement of such cattle in heavy from July to December, and almost four-fifths of our western cattle are marketed in the latter part of the year. The heaviest shipments are in September, October and November, and in some years the number marketed in those months has been as high as 65 per cent. of the total for a year. The result is that prices go down, and the full market is extremely unsatisfactory for cattle producers.

On the other hand, only a limited number of our cattle are winter fed to be sold as finished animals in the period from January to June, and there is usually a good demand for such cattle during that period. The best winter fed cattle come on the market in May and June, and that is when prices are usually best. But even in January the improvement in prices is usually to be noted. Winter feeding, therefore, even for only a short period may not only put cattle in a higher grade by improving their condition and finish, but will probably bring cattle to market at a much better time for selling.

The chart above is one of a number prepared by United Grain Growers to illustrate conditions of livestock marketing.

German Sea Trade

Statistics of Port of Hamburg Show Great Revival

The extent of the revival in German sea trade is reflected in the statistics of the Port of Hamburg. In May of 1913, a banner year, 1,145 vessels, totaling 1,241,000 net registered tons, arrived at Hamburg. The arrivals of May, 1922, were 1,242 vessels, totaling 1,395,000 net registered tons. In May, 1912, the departures from the port showed 1,169 vessels, totaling 1,225,000 net registered tons. In May, 1922, departures, totaling 1,242,000 net registered tons, departed.

Allies Entrenched At Strategic Points On The Dardanelles

LONDON.—With British troops entrenching at strategic points on the Dardanelles, French and Italian battalions rushing to join them, and from far New Zealand went an Anzac contingent with a small force of the scene of their heroic sacrifices in the late war to assist in dealing with the Turkish Nationalists, there is a swift carrying into effect of the Allied pronouncements regarding a firm determination to provide the freedom of the Dardanelles and the Bosphorus.

The British troops are supported by strong artillery and backed by the fleet, and officials here are confident that the combined land and sea forces, which are declared to already be prepared for any eventuality, can hold Constantinople against all odds.

The Turks have bombarded the last departing Greek transports from the Chios Peninsula, despite the British appeal for mercy on the ground that the Greeks were helpless and no longer combatants. Mustafa Kemal Pasha is now supreme over all Anatolia, but as yet has made no direct move toward Constantinople or the Straits, and the warnings which the Allies have vowed throughout Europe and the Near East may have served their purpose.

Smyrna, which last month was the centre of Greek ruin, is a ruin, with fire raging for three days and continuing, but diminishing in violence. Only the Moslem quarter has escaped.

Up to Saturday evening, the British Foreign Office had received no news of loss of life among British subjects.

Alberta Men Winners

New Westminster, B.C.—F. Collitt, of Crossfield, Alta., won the grand, the senior and the junior championships for Hereford cows at the fair here. The Canada Land and Irrigation Company, Medicine Hat, and Hoover and Son, of Weyburn, LaBelle, Alta., were among the big winners in the sheep competitions.

America's Part in War

New York.—Sir Auckland Geddes, British Ambassador to the United States, speaking at a dinner given to visiting delegates to the National Police Conference, said that America played a great role in ending the world war and that anyone who said otherwise was one of three things, "ignorant, malicious or just a fool." Both the British Ambassador and John W. Davis, former American Ambassador to Great Britain, referred in their addresses to the recent statement attributed to Rudyard Kipling, belittling America's part in the war. Ambassador Geddes warned his hearers to be on their guard against those who sought to sow seeds of discord.

CATTLE QUARANTINE RIGIDLY ENFORCED

BRITAIN TAKING PRECAUTIONS TO PREVENT SPREAD OF FOOT AND MOUTH DISEASE

Toronto.—That the cattle quarantine regulations in England are being rigidly enforced to prevent the spread of foot and mouth disease may be judged by the experience of H. H. Bull and Sons, Brampton, who were obliged to charter two special steamers in which to transport from the Channel Islands to Canada a shipment of Jersey cattle which reached Quebec on the steamship Hantsford.

The cattle had to be transferred in the channel after their departure on a special steamer from Jersey to the Hantsford, the latter steamer being obliged to continue the journey with only one touching at port on the other side of the Atlantic. It was also stipulated that the cattle should be transported to one ship from the other in specially constructed crates. This done, the crates had to be destroyed.

Not Racial Move

Educational Reason Given for Segregating Chinese Students

Victoria, B.C.—Segregation of Chinese school children in this city is being taken from purely an educational rather than a racial standpoint, according to a resolution passed by the School Board. The question of the segregation of Chinese children was considered in camera.

The resolution made no mention of Chinese, but states that certain accommodation will be set aside for the teaching of classes of all pupils whose light knowledge of the English language is causing retardation to themselves as well as interfering with satisfactory progress of other pupils in the same class.

Quebec Has Large Crop

Quebec.—In an official statement, G. E. Marquis, Chief Statistician of the Province of Quebec, estimates that Quebec's 1922 crop will reach a value of \$225,000,000, as compared with \$219,000,000 last year.

MAY ADMIT IRELAND TO LEAGUE OF NATIONS

FREE STATE MUST PROVE THAT ORDER CAN BE KEPT

Geneva.—The Irish Free State's chances for admission to the League of Nations now appear to be good. Irish application is not on the agenda of the assembly, but the steering committee has set it there. It is said that Michael MacWhite, the Irish Free State delegate to the League, returned to Dublin to report on the situation here. All that is necessary for the admission of the Free State now, it is said, is that she give some sure indication that she is able to keep order and disposed to ratify the Irish constitution.

It is understood that the British delegates, including the Canadian, will be satisfied with such assurance, and will offer no opposition.

If Free State Ireland is admitted, it would give the Empire group seven votes in the League Assembly, but thus far little significance has been attached to the point, as Mr. Deagras pointed out that the Irish vote might in many instances be expected to counterbalance that of the other sections of the Empire.

Rescues Three Boys From Whirlpool

Forty-four-Year-Old Girl Gave Life to Save Companions

Blenheim, N.Y.—A remarkable act of self-sacrifice in which a fourteen-year-old girl gave her life to save three companions, has been received here.

While 500 children were bathing in the water near an orphanage of the Allegheny River, three small boys were carried below the safety ropes into a dangerous whirlpool. Ruth Manning, the only other person near, was to the edge of the whirlpool and succeeded by almost superhuman efforts in rescuing all the children and carrying them to safety. Then she collapsed from over-exertion and died before a lifeboat could reach the rock.

Memorial at Port Said

Monument for Soldiers of Australia and New Zealand

Ottawa.—A memorial to the soldiers of Australian and New Zealand forces who laid down their lives in Egypt, Palestine and Syria will be erected at Port Said on the northern shore of the Suez Canal. Information to this effect has been received by the Minister of Defence, coupled with a statement that the Premier of Australia is desirous that Australian and New Zealand designers in Canada be informed of the fact that they are eligible to submit designs for this memorial should they desire to do so. Information is obtainable from the Minister of National Defence.

Dutch Farmers May Come to Canada

Government Scheme to Assist Experienced Men to Migrate

Ottawa.—An influx of experienced agriculturists from Holland to Canada is likely, according to Baron J. C. G. Sandberg, who left Ottawa for Holland on Saturday. He is on his way to interview Mr. Charles Stewart, Minister of the Interior, and other members of the Government. Baron Sandberg was in Ottawa representing the Government of Holland, which proposes a scheme of assisted emigration of farmers and agricultural laborers and their families.

New Prize For Aircraft

Plane Flying English Channel on Least Fuel Wins 15,000 Francs

Paris.—M. Bleriot, famous French aviator, has won a prize of 15,000 francs for an aeroplane competition in which the object will be to make a flight and return across the English Channel with the use of the smallest quantity of gasoline. Light machines with small motors are specified and it is estimated that they must use more than three quarts of fuel.

Greeks Fire City Before Leaving Constantinople.—The occupation of Brusa—by the Turkish Nationalists, which occurred Sept. 31, marks the end of the Greek resistance in Asia Minor. Before evacuating the city the Greeks set it ablaze in several places, but the fire was brought under control, and only a single quarter of the town was destroyed.

Russia Protest Against Allied action in Constantinople has been sent to Great Britain by the Soviet Government, which takes the stand that the Allies have acted entirely according to their own wishes and against the interests of Russia, Turkey, Ukraine and Georgia.

Closing of Ford Plant

High Price of Coal Given as Reason

Detroit.—Henry Ford has taken steps to close his Detroit automobile plants, thereby throwing upwards of 100,000 workers in the Detroit district out of employment for an indefinite period.

The closing of the Ford plants is in fulfillment of the motor magnate's assertion of a few weeks ago that they would close on September 16 because of the shortage of coal, due to mine and rail troubles, for which he holds the "big interest" of the country responsible.

Simultaneously, it was announced a number of smaller manufacturing concerns here that supply the Ford plants with parts and accessories will be closed for an indefinite period upwards of 30,000 men. The Ford workers to be thrown out of employment total approximately 70,000.

Mr. Ford announced several weeks ago that he would close his Detroit plants on September 16 because of the coal situation. He denied that a real shortage existed, and charged that certain coal brokers were demanding an exorbitant price for coal. He said that rather than pay the prices, he would close his plants for an indefinite period.

Ford Motor Company foremen received instructions to advise all workers under these charges to "save their money and live as economical as possible during the suspension." Many workers said they took this to mean that the shut down might be protracted.

Two B.C. Miners Buried Alive

Merrill, B.C.—Two men were buried alive in the Middlebrook Collieries when a mass of rock fell on them while at work. The men, Crawford and Lewis Shearer, both experienced miners. Their bodies were recovered within an hour, but all attempts to resuscitate them failed.

Western Improve Photography

Butterfly may be kept up to camera at Willow Beach, and brother of D. D. Noel, of Butteville, has recently perfected an improved photography for which he has been offered the sum of \$25,000.

King Victor Emmanuel Reported Ill

Naples.—King Victor Emmanuel of Italy is seriously ill here, according to the Matrone. The newspaper said that King Victor contracted his illness on a journey in the Trentino Mountains.

SUCH PAINS AS THIS WOMAN HAD

Two Months Could Not Turn in Bed. Lydia E. Pinkham's Vegetable Compound Finally Restored Health

Seattle, Washington.—"I had dragging pains in my feet, then I had such pain in my back and fever and I was in bed for two months. I could not turn myself in bed and could not sleep. I was trying everything I could think of, but I could not get any relief. I bought a bottle of Lydia E. Pinkham's Vegetable Compound. I took it regularly and all my troubles were cured. I was able to get up and to do my work again. The hard lump I had in my back and in all my veins. A lot of many women it has helped."—Mrs. G. B. Bennett, 4600 Olive St., Seattle, Washington.

This is another case where Lydia E. Pinkham's Vegetable Compound brought results after trying everything else. If you are suffering from pain, nervousness and are any time of the month, you are in need of Lydia E. Pinkham's Vegetable Compound. It may help to relieve the present distress, but prevent the development of more serious trouble.

Question Of Moratorium Is Subject Of Discussion By Manitoba Legislators

Russia Jubilant Over Turkish Success

High.—Russia recognizes only the agreement between Turkey and Soviet Russia regarding the Dardanelles and Bosphorus, allowing free passage of ships to all nations for commercial purposes only, declares M. Karakhan, Deputy Foreign Commissioner. In his reply to the note sent by Lord Balfour, Russia insists that only interested countries in the neighborhood of the Black Sea should be considered, and that the more distant countries have no right to interfere. Russia, the reply says, follows with the greatest interest and delight the Turkish successes in Asia Minor.

MAY WIPE OUT CERTAIN DUTIES

FEDERAL GOVERNMENT OF AUSTRALIA IS CONSIDERING PLAN

London.—With a view to relieving the primary producers in Australia, a Bill to amend the Customs Act, 1906, is being introduced. It is reported that the Australian Federal Parliament is favorably considering Government proposals to temporarily wipe out the duties against Great Britain and considerably modify the duties against other countries in regard to certain commodities. At the same time, bounties are being fixed to be paid to the producers of present duties in order to safeguard local industries.

It is estimated that the duty remissions will total \$250,000 and the bounty liability \$250,000. All parties in the Parliament support the measure in view of the approaching general election in an endeavor to secure the farmers' vote.

Would Regulate Export Of Canadian Cattle

Agricultural Council Anxious to Keep Quality Up to Standard

Winnipeg.—Restrictions as to the quality of cattle exported to Great Britain since the embargo is in effect and regulation to approximate the demand at the several seasons of the year, are being sought by the Canadian Council of Agriculture.

The council is appealing to the Dominion Government, through the ministry of agriculture and trade, to the commerce, in order that the British market may not be flooded with Canadian cattle at inopportune times, and that the quality of the cattle may be up to the standard required by the British buyers.

Saskatchewan Sells Debentures

Dominion Securities Corporation of Toronto Were Buyers For Syndicate

Regina, Sask.—At a net cost of \$19 per cent to the province, the Dominion Securities Corporation, of Toronto, representing a syndicate comprising themselves and Dillon, Read and Company of New York, purchased \$1,380,000 Saskatchewan twenty-year five per cent debentures, their price being \$1.65. There were nine tenders. Bidders were asked to quote on four different bases for fifteen and twenty per cent debentures bearing interest at 5 and 5½ per cent.

Death of Premier Bracken's Father Saskatchewan.—Ephraim M. Bracken, father of Premier Bracken, died at his home in Regina, Sask., on Saturday. He was 82 years of age. He was a member of the Saskatchewan Agricultural College, Winnipeg. He went to Winnipeg in July last for a visit and had been unable to return since. He had a stroke about a year ago and has been in failing health ever since.

To Improve Vancouver Harbor

Ottawa.—The Government has advanced \$25,000 on a loan to the Vancouver Harbor Commissioners to meet an account of expenditures on harbor improvements during 1921. The total advance authorized is five million dollars, of which \$1,250,000 has been advanced to date.

Transport Diverted

Malta.—The British military transport Romani, bound for India, has been diverted to Malta to take a British battalion to Constantinople.

Winnipeg.—An intimation which almost amounted to a warning, was given by Hon. Neil Campbell, Provincial Minister of Agriculture, to loan companies, implement houses and banks, to deal gently with farmer debtors. Discussing the possibility of a moratorium being adopted for the province this year, he stated that while no decision to enact such legislation had been arrived at, the financial interests would have to give the utmost consideration to farmers in view of the protracted period of financial difficulties.

The minister declared the matter of a moratorium would be taken up in the Cabinet at the first opportunity. From other sources it was learned that a meeting between representatives of the loan companies and members of the Cabinet had been held and that while moratorium issues had been raised, other ways of assisting farmers over the difficult period were favored by the Government. Consideration of the moratorium issue will be given by the Board of Directors of the United Farmers of Manitoba at their next meeting early in October, W. R. Wood, Secretary of the Association, declared.

That the reference made by Premier Dunning of Saskatchewan, during his recent visit to the United States, to a moratorium in that province, was illadvised, was the opinion expressed here by Sir John G. D. Macdonald and General Manager of the Canadian Bank of Commerce.

Referring to the statement of Premier Dunning that the province was "nearer to a point at which a general moratorium may have to be declared than it ever has been before," Sir John declared that no necessity for such extreme measures exists in the province. He pointed out that the farmers were not responsible for the price of grain, nor could they influence it. He would like, Sir John said, "to see the farmer get a minimum price of a dollar a bushel. That would mean a net loss of about \$1.25. However, the farmer has not been so great as for previous crops. Labor has cost less, machinery is better, and now, today, the crops are better. There will be a lot of money in the country, and there is not a point at which such effort to extract the last dollar from the farmer.

"There have been charges made," John continued, "that the banks have little of sympathy in their dealings with debtors. That is not true. He pointed out that it was as much to the interest of the banks that business generally should be assisted, rather than retarded, as any other class, and he had not the slightest doubt that creditors of farmers would be entirely reasonable in their dealings with their debtors. A moratorium could scarcely fail to do more harm than good. It would retard credit and would hold back the flow of money from the other side.

Modern Transportation

Propose to Establish Motor Truck Traffic Out of Swift Current cannot have some of the national railway facilities so urgently needed, perhaps the situation can be overcome in a large measure by adopting other modern means of transportation. There is a project under way at the present time to establish a motor truck traffic route put into operation between this city and the Weyburn-Lethbridge line.

Valuable Cargo From Orient

Victoria, B.C.—With a large passenger list and a rich cargo of raw silk and Oriental merchandise, the new liner, Empress of Australia, reached here Sept. 31. Major Vaters Brown, Indian agent in the Maritime Provinces, was en route to Montreal in connection with the Canadian colonization scheme.

GIN PILLS
FOR THE KIDNEYS
THE WORLD'S BEST REMEDY FOR RHEUMATISM AND BLADDER TROUBLE

UNLESS you see the name "Bayer" on tablets, you are not getting Aspirin at all

Accept only an "unbroken package" of "Bayer Tablets of Aspirin," which contain directions and dose worked out by physicians during 22 years and proved safe by millions for

Colds Headache Rheumatism
Toothache Neuralgia Neuritis
Earache Lumbago Pain, Pain

"Bayer" boxes of 12 tablets—Also bottles of 24 and 100—Druggists. Aspirin is the trade name for acetylsalicylic acid of Bayer Manufacturers of Mono-nitrobenzene of International. While it is well known that Aspirin means Bayer Aspirin, it is not known that Bayer Aspirin is the only Aspirin that is safe. Bayer Aspirin is the only Aspirin that is safe. Bayer Aspirin is the only Aspirin that is safe.

Express Rate on Cream.

Rate of Three Gallon Cans Allowed to Alberta Dairymen

Favoring the establishment of an express rate on three gallon cans of cream that would be lower than the rate on five gallon cans, the Board of Railway Commissioners for Canada allowed the representative of the Alberta Dairyman's Association and the express companies one month's time in which to arrive at some suitable arrangement. Failing to reach a satisfactory agreement, the Railway Commission will form a tariff.

The Alberta Dairyman's Association was represented by A. Chard, traffic superintendent of the Provincial Government, who, in giving his evidence, stated that owing to the recent legislation passed by the Provincial Government it was essential to establish a rate on three gallon cans of cream. If the smaller producers of cream were not to be penalized.

Application of the Alberta Milk Company, Limited, for a reduction in the express rate on fish from Edmonton and points north to the same rate as for fish shipped from Vancouver, was made to the commission, but the chairman reserved judgment until he had conferred with the other members of the board. W. S. Campbell, who represented the Alberta Fish Company, stated that the average weight of shipping fish from Edmonton and points north to Chicago was 25 per cent. higher than for fish shipped from the coast, although the distance from the coast was from 500 to 800 miles farther.

IN THE SHADOW OF POOR HEALTH

In This Condition Relief Comes Through Dr. Williams' Pink Pills

When the shadow of poor health falls upon you; when hope fades and life itself seems scarcely worth living, then is the time you should remember that thousands just as hopeless as you feel, have been restored to the sunshine of health through the use of Dr. Williams' Pink Pills. The rich red blood which these pills actually make, strengthens the whole system. The nerves are strengthened, headaches vanish, the appetite improves, and once again there is joy in life. Among the thousands benefited by the use of this medicine is Mrs. J. Robinson, Oshawa, who says: "Some time ago I was in a very bad condition and I was weak I would faint away at times. I had no appetite, could not do my housework, in fact life seemed scarcely worth living. I was exceedingly nervous, in fact life seemed scarcely worth living. Then one day I saw Dr. Williams' Pink Pills recommended for a similar condition and I got a supply. I continued taking the pills until I had used about a dozen boxes and they have made me a well woman. I can now do a good day's work about the house, have no more fainting spells and can go about more actively than I did before. I believe these pills just the thing for me, weak girls and women and if given a fair trial will do for them what have done for me."

You can get these pills through any medicine dealer or by mail at 50 cents a box or six boxes for \$2.50 from The Dr. Williams' Medicine Co., Brockville, Ont.

A Secret

One great secret of living rich and contented is to expect it. To look out on the world with friendly eyes and a kindly heart is to create an atmosphere in which poverty flourishes. This is a cold and selfish world to those who are always expecting a snub.

It is one thing to tumble to a scheme, but quite another matter to fail for it.

The Coliseum at Rome held 100,000 spectators, of whom 57,000 were seated.

It is one thing to tumble to a scheme, but quite another matter to fail for it.

For Infants and Children

In Use For Over 30 Years

Always bears the Signature of

Junior Red Cross

Splendid Work Carried on by Junior Red Cross in Saskatchewan

Over 1,000 children in Saskatchewan are 1-10 to be exact—who are crippled or suffering from some defect requiring the services of a specialist, and whose parents were financially unable to make necessary provision for their treatment, have been reported to the Junior Red Cross, and treatment provided for the vast majority of these cases out of the Junior Red Cross Fund for Crippled Children.

The tangible evidence of the splendid work being carried on by the Red Cross in Saskatchewan was reported at a meeting of the Junior Red Cross Committee held at Regina a few days ago.

During the past twelve months cases calling for treatment have been reported on an average of more than two a day. They have been cared for at the Sanatorium at Fort Qu'Appelle and in hospitals all over the province. At one time recently every child but one in the children's ward of a Saskatoon hospital was a Junior Red Cross patient, and there are always a number of such patients there and in the Alexandra Club ward of Regina General Hospital, and in the J.O.D. Children's Pavilion at the Sanatorium.

Nor is there included in this number, large as it is, the many children who have received dental treatment in rural schools from the two travelling Junior Red Cross dental cars.

The number of children receiving dental treatment up to August 31 last was 2,536, while the number of filings, extractions, etc., totalled 5,101. Addresses in the schools on oral hygiene by the dentists numbered 161, at which over 5,000 children were present.

During the twelve months ending August 31 the Junior Red Cross Committee expended \$30,000 in this work. Almost \$30,000 had been paid to the Saskatchewan Sanatorium alone for treatment and maintenance of boy and girl patients, and in addition, which could not afford to have necessary care given them in order to check the ravages of the dread disease.

The interesting phase of Junior Red Cross work for children has been the holding of clinics at isolated points where traveling Junior Red Cross nurses have disclosed numbers of children requiring operations for the removal of diseased tonsils and adenoids. Five such clinics were organized by the Junior Red Cross between June 1 and August 31, and were held at Torquay, Qu'Appelle, Chatham, Green Lake, and Tarnopol. In all 123 children were successfully operated on. So successful indeed was this new department of the Junior Red Cross that it has been decided that similar clinics have been organized in school districts and by municipal health officers quite apart from the Red Cross.

In order to continue this medical and good health work on the large scale it has already attained, the need of the Junior Red Cross organization into all the schools was clearly indicated, and with the opening of the fall term, conferences are being made, and already with gratifying results, to organize many new branches. "This is being done with the wholehearted commendation and active cooperation of all Department of Education officials from the minister down, and including the deputy minister, school inspectors, school nurses, teachers and school district officials.

To further augment the fund for this work it was decided to make the issue of a Junior Red Cross Christmas Stamp an annual event. The 1927 stamp, of which half a million have been ordered to sell at one cent apiece, Miss Keating, our supervisor in Regina, Canada, has contributed the most attractive design in three colors, red, green and black.

The members of the Junior Red Cross Committee are unlimited in their praise of, and thanks to, the doctors of Saskatchewan who have most generously given of their time and skill in the treatment of these many young patients without remuneration. It had not been for this splendid public-spirited co-operation by the doctors in this humanitarian work it would have been quite impossible to accomplish such a vast amount of good. Parents and children as well as the Red Cross, are deeply grateful and have requested the good offices of the press to be given to give public expression to their appreciation.

The "rejoice" coal from Pennsylvania coal mines amounts to some 200,000,000 tons a year.

There are 40,000 muscles in an elephant's trunk, and only 527 in a man's body.

A Combination of Two Materials and the Result is Chic

Whole System Is Benefited By Tanlac

Thousands of frail, nervous people and convalescents everywhere have testified to the remarkable power of Tanlac in bringing back their health, strength, and working efficiency. It seems to quickly invigorate the constitution and is a powerful force of weakness. Mrs. John Hailick, 901 Notre Dame Ave., Winnipeg, Man., says:

"Five years ago I had a nervous breakdown. I couldn't even hold a glass of water without shaking it out. My head ached so I thought it would split and I got so dizzy that several times I fell and hurt myself so bad the scars are on my eye. Six bottles of Tanlac actually made me feel like a different person. All my troubles are now gone."

There is not a single portion of the body that is not benefited by the helpful action of Tanlac. It cleanses the stomach to turn the food into healthy blood, bone and muscle, purifies the system and helps you back to normal weight. Get a bottle today at any good drugstore.

Road Building in Canton

Chinese Adding Miles of Modern Streets to Highway System

While road building in Canton, China, is not proceeding with the same rapidity as in this country, its programme is quite progressive, when it is considered that prior to 1925 there were only 100 miles of roads which a motor car could make any progress without broken axles and injured spines. In 1925, 200 miles later, however, these progressive people, after years of inactivity, had added nine miles of modern streets to their highway system and seven and one-half miles were under construction.

The Oil of the People—Many ailments have come and gone, but Dr. Thomas' Electric Oil continues to maintain its position and increase its sphere of usefulness each year. Its sterling qualities have brought it to the front and kept it there, and it can truly be called the oil of the people. Thousands have benefited by it and would use no other preparation.

**Ld. George Explains
The British Aims**

Declaring that the closing of the Dardanelles by Turkey in 1915 prolonged the war by two years and broke the power of the allied blows in the Balkans by isolating Roumania, and expressing determination that no matter what happened such a state of affairs should never occur again, Premier Lloyd George on Saturday gave a comprehensive statement of British policy to press correspondents

The premier denied emphatically that Britain was pro-Greek. He said that a few weeks ago the Greeks desired to cross the neutral zone and the proclamation issued against them by Sir Charles Harrington was identical with that sent Mustafa Pasha, after the Greek defeat.

Lloyd George declared that in Britain's estimation, the peace of Europe would have been fearfully endangered had the blood-thirsty Turkish army been allowed to overrun Thrace immediately after their victory over the Greeks. Britain, he said, was not concerned with what happened at the forthcoming peace conference, saving only that the freedom of the Straits must be ensured

Burdett News

From our own Correspondent

Mr. J.W. Warry is the guest of his son Mr. Ed. Warry

There has been quite an epidemic of Chickenpox in the School a number of the pupils being in quarantine

Mr. Judd left last week for Lethbridge where he expects to have employment for the winter

Dr. J. Blackburn, of Hull, Quebec, was here for a few days, on business, and incidentally calling on old friends

A number of people in town received cards from Mrs. L. Sheng from Hong Kong, China, saying she had arrived safely and was well

Mr. and Mrs. Wm. Piper and children are the guests of her sister Mr. Garbould

Miss Spangle who has been at Medicine Hat for some time has returned to the Passmore

Mr. N. F. Strom had the misfortune to get his foot hurt in a threshing rig. Dr. McNeil was called and dressed the foot but recommended him to go to the Hospital, as there was danger of rupturing the blood vessels in his foot and would need instant attention in such an emergency. Mr. and Mrs. Strom went to Medicine Hat. Last reports are that Mr. Strom was doing well

Miss Volma Seveland who has been visiting Miss Gladys Olney returned to her home south of Bow Island

On Monday morning, October 2nd, an interesting Wedding took place at Bow Island when Miss Mable Straley and Mr. Louis Emard were united in Holy Matrimony at St. Michael's Church. Rev. Father McCoy officiating. The bride was attended by her father Mr. Walter Straley. Among those present were Mr. and Mrs. U.G. Emard father and mother of the groom and his brothers—the well known Emard Brothers. Mr. and Mrs. Louis Emard took the train immediately after the ceremony for parts unknown, their destination was kept a profound secret. Louis and Mable are both well known in these parts where they have lived for some time and are both very popular. The whole community join in wishing them all happiness in their married life

Lumbering in British Columbia

The greatest industry in British Columbia is lumber. Many thousands of men are employed in handling it, from the adventurous prospector who sets out for parts unknown and unexplored to look for fresh and profitable timber-lands, down to the expert puller who finishes off the beautifully veined panel of Douglas Fir at the factory.

It is estimated that there are 400 billion feet of merchantable timber in the Province, more than half the forest wealth of Canada, and experts say that over five times the amount at present cut every year could be used without encroaching too much on the timber resources of the Province.

The value of forest products for 1919 was \$70,235,094, but this was largely owing to the high prices prevailing for all lumber, wood-pulp, etc., due to a world shortage and a great demand.

The Douglas Fir is the most famous of all British Columbia's trees, growing to a height of 250 ft. and 4 and 5 ft. in diameter. It is used for house construction, boat-building, mine props, poles, railway ties, bridge and trawl timbers and many other things.

Then there is the Red Cedar, famed all over the world for the shingles it produces, doors, frames and finely dressed panelling for living-rooms; the Sitka Spruce for aeroplanes, and Western Hemlock for box-manufacturing and pulpwood.

Vancouver is a city of saw-mills, there is a fringe of them lining the creeks and inlets of the coast around the city and one seldom looks out to sea without watching some little tug towing a huge boom of logs behind it that have come perhaps from some camp hundreds of miles away up the coast.

Who shall say the lumberjack's life is not one of the best there is? Cave free and next to nature, he spends his day in the great outdoors with the scent of the sap that oozes out of the fresh-cut cedar, the swell of the woodsmoke of his camp fires, of wet moss and burning balsam bark.

Instead of the deafening din of restless humanity he hears the roar of a distant waterfall, the call of wild geese or the warning cry of his fellow—"Timber!"—meaning thereby the silent forest before thunderous that tells him that another giant fir has fallen beneath their hands.

His good day's work done, he has nothing else to think about but to nibble a meal all ready waiting for him. The work is done and a good day's work is over.

(1) A Donkey Engine used to draw in and load logs on the cars.

(2) Cutting down a Douglas Fir tree in B. C.

—and sound sleep.

There are in British Columbia 212 saw-mills and 70 shingle mills, so it will be realized that the lumber world is a vast one.

—H. G. W.
